

## Operational Benefits

- > Risk Free - removes need for in-vehicle operators
- > Continues operation up to 96 hours
- > Tailored to the tactical and strategic needs of every customer
- > Low maintenance
- > Cost-effective operation

## Key Features

- > Cellular interception system
- > Day/night near-360° observation
- > Fully remote controlled systems
- > Real-time data recording and dissemination
- > Withstands high temperatures for lengthy periods
- > Independent energy solution with rechargeable batteries
- > Various communication methods to head-quarter:
  - Multi-channel cellular
  - Extended WiFi
  - Coded Orthogonal Frequency Division Multiplexing (COFDM)

## Communication methods to head-quarter:

## Remotely-Operated Intelligence Vehicle

### Risk-free intelligence gathering via remote operation of vehicle systems

When comprehensive surveillance is required in hostile or unsafe areas, the YTS Remotely-Operated Surveillance Vehicle delivers interception, intelligence gathering and nearly 360° observation without risk to on-board crew.

An important element of an overall surveillance strategy, the vehicle aids intelligence units, police and other security agencies with critical interception and observation capabilities in areas where security personnel may be at risk.

Off-site operators control the vehicle's systems, facilitating the real-time transmission of surveillance data to headquarters or control units.

The Remotely-Operated Surveillance Vehicle is equipped with a range of audio and video sensors, encrypted communication, and advanced day/night observation capabilities for various ranges. Suitable for the most hazardous environments, the vehicle is further secured by a sophisticated system that alerts when the vehicle is compromised in any way.

Part of the YTS fleet of special operations vehicles, the Remotely-Operated Surveillance Vehicle harnesses 30 years of surveillance experience in real-life operational scenarios. The vehicle is suitable for a wide range of applications, including complex surveillance missions and terror prevention. YTS vehicles are in use by Israeli government and security agencies, and in other law enforcement agencies around the world.

Remotely-Operated intelligence vehicle tailored to the mission and to the client's tactical needs

Extended operation up to 96 hours

Fully remote controlled systems

Real-time data recording and dissemination

### **Panoramic surveillance for comprehensive coverage**

YTS employs its deep understanding of security and intelligence missions to design a vehicle that enables autonomous intelligence gathering operations.

### **Remotely-guided extended operation**

Advanced energy and heat exhaust systems enable continuous remote operation for up to 96 hours in even extreme temperatures.

### **Fully customizable surveillance solution**

As a systems integrator with extensive field experience, YTS sources the right technology and equipment for each individual customer, delivering a completely tailored solution.

Panoramic surveillance for comprehensive coverage
